Alerting Abstract WO A2

NOVELTY - The system employs a classical three-tier web-based architecture (using a client, an application server and a database). Businesses are issued identifiers and a user's permission is compared with the identifier of the resource before validation. To complete a system-enabled transaction a signature verification tool on the server side is verifies the integrity of a signed block of text.

DESCRIPTION - An INDEPENDENT CLAIM is also included for an apparatus for electronically processing information, a computer program stored on a computer readable medium.

USE - For e-commerce systems.

ADVANTAGE - It provides confidential and authentic government reporting of taxable events, licenses, permits, employee information, legal information and regulations in a time and cost effective manner without need for businesses to fill in forms to submit in person or by post.

DESCRIPTION OF DRAWINGS - The figure shows an illustration of the components of the system network architecture used to submit government regulatory information.

Title: A fast, easy sort

Author(s): Lacey, S.; **Box, R.**

Journal: BYTE vol.16, no.4 p.315-16, 318, 320

Publication Date: April 1991 Country of Publication: USA

CODEN: BYTEDJ ISSN: 0360-5280

Language: English Document Type: Journal Paper (JP)

Treatment: Practical (P)

Abstract: A bubble sort is the first standard sorting algorithm most programmers learn how to code. Those who continue to write programs for mainframes, personal computers, or even programmable calculators may continue to use a bubble sort simply because it's intuitive, it's easy to write and debug, and it consumes little memory. A bubble sort would most likely be the standard sorting routine today if it were not so incredibly slow for most lists. However, a few simple modifications to this classic routine make it a fast and efficient sort for all kinds of lists. (0 Refs)

Sorting through sorts

AUGMENTED TITLE: discussion of article by M. Gong

Box, Rick ;

Dr. Dobb's Journal v. 25 no6 (June 2000) p. 10

DOCUMENT TYPE: Feature Article ISSN: 1044-789X LANGUAGE: English

RECORD STATUS: Corrected or revised record

ABSTRACT: In a discussion of the March 2000 article by Mingfu Gong on group sorting algorithms, the writer points out that Gong's algorithm is a modified Comb Sort. He also states that the method employed uses a bidirectional bubble sort, which violates the principle of regrouping because many of the same pairs are compared twice.

A fast, easy sort: a few simple modifications to a bubble sort greatly speed up this classic routine. (includes related article detailing the generalization of a bubble sort that offers more speed) (tutorial)

Lacey, Stephen; Box, Richard

Byte, v16, n4, p315(5)

April, 1991

DOCUMENT TYPE: tutorial

ISSN: 0360-5280

LANGUAGE: ENGLISH

RECORD TYPE: ABSTRACT

ABSTRACT: A simple generalization of a bubble sort, the Combsort, is developed that offers superior sorting speed for all types of lists plus ease of coding. Bubble sort routines are easy to write and debug, intuitive and require little memory, but are extremely slow because the routines involve the comparison of one list element to the next, with the lowest value 'bubbling' ahead in the list. Bubble sorting is slowed even more when a relatively low value is near the end of a list to be sorted, requiring many comparisons for the element (nicknamed a 'turtle') to slowly move up to its appropriate position in the sorted list. Combsort eliminates turtles by allowing the distance between elements to be compared be greater than one up to the list length divided by 1.3. This enables turtles to make large jumps. The distance is successively reduced as more and more elements near their final positions.

Lockheed Martin Opens Direct Link for Consumers with Government Offices Via the Web

PR NEWSWIRE

September 21, 1998

SANTA ANA, Calif., Sept. 21 /PRNewswire/ -- Transacting business with local government got a little easier today with the introduction of GovernLink(TM), a new electronic commerce program that allows individuals to access government records and services from their home or office computer. Introduced by Lockheed Martin, GovernLink provides consumers with confidential and secure access 24-hours-a-day to various government records. In its first application, the innovative service is designed to link county and municipal government offices across the nation directly to consumers, allowing them to access birth, death and marriage certificates, or to search a fictitious business name without having to visit or wait in lines at the government centers. "Consumers routinely use the Internet to access a variety of information. Lockheed Martin, using Web-based technology, now has provided a direct link from home or office to the halls of local government," said Holli Ploog, managing director and senior vice president with Lockheed Martin, which is partnering with Oracle Corp., to offer the innovative government service. Oracle will provide its Internet computing technology, which includes the Oracle8 database, Oracle Application Server and other products. "More and more consumers also are discovering the convenience and efficiency of purchasing goods and services over the Internet. GovernLink opens a new door that allows consumers to quickly and effectively handle various transactions," Ploog said. The innovative local government service was unveiled here today at the annual meeting of the California Clerk-Recorders' Association Conference in Orange County. GovernLink is now available to the county's approximately 800,000 residents on the Internet at www.oc.gov/recorder/. Orange County Clerk-Record Gary L. Granville said, "Orange County is pleased to be the first local government in the country to offer this service to its residents. This service will allow residents, including those who are disabled, to access records around-the-clock, making government more convenient and efficient. "The service also will enhance our office operations, because customers will not have to commute great distances or pay additional fees for parking. Local government is government at the front lines of serving citizens, and GovernLink gives us a new tool and additional technology to better serve our citizens," he added. GovernLink is designed to protect a consumer's confidentiality as well as ensure the integrity of the data. Ploog said Lockheed Martin plans to make GovernLink available to government offices nationwide. By using the system, consumers will be able to request and receive government records, including fictitious business names, satisfy regulatory requirements, pay delinquent fees and fines, and apply for licenses and permits. Other GovernLink features are: * Easily customized to meet the requirements of an individual local government Web site. * Allows existing government business processes to benefit from Web-based technology. * Provides consumer access via credit cards to transactional services. * Allows businesses to send and receive privileged data. * Enables electronic funds transfer directly between business and government bank accounts. Headquartered in Bethesda, Maryland, Lockheed Martin (NYSE: LMT) is a highly diversified enterprise principally engaged in the research, design, development, manufacture and integration of advanced-technology systems, products and services. The corporation's primary businesses span space, telecommunications, electronics, information and services, aeronautics, energy and systems integration. Employing approximately 170,000 people worldwide, Lockheed Martin had 1997 sales surpassing \$28 billion. Oracle Corp. (Nasdaq: ORCL) is the world's leading supplier of software for information management, and the world's second largest software company. With annual revenues of \$7.5 billion the company offers its database, application server, tools and application products, along with related consulting, education and support services, in more than 140 countries worldwide. /CONTACT: Ron Jury of Lockheed Martin, 201-996-7057,

Netscape and Intraware to Launch Portal Resource for Information Technology Professionals

PR NEWSWIRE
September 29, 1998

Netcenter Hosts New IT Knowledge Center Providing Up-To-Date Information and Interactive Services Designed for the Enterprise MOUNTAIN VIEW, Calif. and ORINDA, Calif., Sept. 29 /PRNewswire/ -- Netscape Communications Corporation (Nasdaq: NSCP) and Intraware, the full-service Web-based software management services company, today announced an agreement to offer the industry's most comprehensive portal resource for enterprise information technology (IT) professionals. The new co-branded service, called IT Knowledge Center, will be featured on Netscape's fast growing Internet portal, Netcenter, and is expected to serve as a one-stop location for up-to-date Internet computing information and services. With this agreement Netscape and Intraware will offer an online resource designed to meet the needs of IT professionals while heralding a new direction for the emerging portal market towards providing **customized business portal** services. "This is a very shrewd collaboration between Netscape and Intraware. Netscape is committed to making Netcenter the premier destination for IT professionals," said Steve McHale, senior channels analyst at International Data Corp. "Intraware's IT Knowledge Center represents the content these IT professionals are seeking in order to make informed buying decisions about business critical, enterprise software applications. With millions of users expected to search the Netcenter site, Intraware's suite of software lifecycle management services will attract significant visibility. This partnership has the potential to make the Computing and Internet channel of Netcenter the dominant IT destination for enterprise customers." The Netscape Netcenter IT Knowledge Center is a premier compilation of information and services designed to help IT professionals research, evaluate, procure and update software. The IT Knowledge Center is expected to go live on the Netcenter Computing and Internet channel located at <http://home.netscape.com> by the end of October. This announcement is part of Netscape's recently announced Project Turbo, an aggressive campaign to make Netcenter the fastest growing Internet portal. "Our agreement with Intraware to create the Web's most comprehensive resource for IT information and services marks an important direction for Netcenter towards **customization** for businesses," said Mike Homer, executive vice president and general manager of Netscape's Netcenter division. "By combining Netscape's understanding of enterprise markets with Intraware's focus on content and interactive services, the IT Knowledge Center will become the flagship resource for IT professionals on the Web." The IT Knowledge Center will provide users with access to a range of Intraware's enterprise IT services including: * Radarscope, an application containing a centralized listing of all Intranet and Extranet software applications available on the market. Users can search thousands of records by category, company and product, then follow links to additional information and Intraware resources; * Compariscope, an interactive decision support service that provides comprehensive information on the strengths and weaknesses of leading Intranet and Extranet software products

and tools; * "Ask James," an online advice service that addresses questions about the Intranet software industry, technologies and products; * SubscribNews, a news source with weekly alerts and digests about Intranet software and technologies; and, * Intranet Library, an in-depth resource for product information, technical papers, and reviews. "Netcenter attracts millions of users, including large numbers of IT professionals, every day," said Peter Jackson, President and CEO of Intraware. "The IT community needs fast and efficient access to information that will help them to build and support better information systems. The IT Knowledge Center is designed to provide these users with the expertise and solutions they need. We believe the IT Knowledge Center will make Netcenter the premier Web destination for IT professionals." Netscape's Computing and Internet channel is a key component of Netscape Netcenter. The Computing and Internet channel is designed to provide the latest tools, information and services to meet the computing needs of any consumer ranging from home to business users. Whether to simply use the Internet as a research tool or as a means to choose an Internet service provider, buy software or to get advice, the Computing and Internet channel provides timely Web-based content and services to help consumers succeed in the Net Economy. About Intraware Founded in 1996, Intraware, Inc. is the premier provider of software lifecycle management services for corporations and enterprise software vendors worldwide. Intraware meets the growing needs of corporate IT for interactive knowledge-based and software delivery services across the evaluation, purchase and maintenance continuum with Compariscope, intraware.shop, and SubscribNet. These powerful services also enable Intraware's partners, including Netscape Communications (Nasdaq: NSCP), Informix (Nasdaq: IFMX), NetDynamics, Marimba, Intershop, Oblix, SunTest, Open Text, and RealNetworks, to more effectively and efficiently sell and maintain their products. Intraware is funded by private investors including Kleiner Perkins Caufield & Byers, Attractor Investment Management, Canaan Partners, WI Harper, and Technology Crossover Ventures. Based in Orinda, California, Intraware has sales/engineering offices in New York, Los Angeles, Chicago, Washington, D.C., Cleveland, Boston, Dallas, and Seattle. Intraware's main address is 25 Orinda Way, Orinda, Calif. 94563; (925) 253-4500; FAX (925) 253-4599; About Netscape Netscape Communications Corporation is a leading provider of software and services for businesses that want to transform the way they create and keep customers in the emerging Net Economy. The company offers a full line of enterprise software solutions, professional services, and a leading Internet portal to help companies build, buy or outsource Internet applications that drive revenue growth, build customer loyalty, and create new levels of business efficiency. Traded on Nasdaq under the symbol NSCP, Netscape Communications Corporation is based in Mountain View, California. Additional information on Netscape Communications Corporation is available on the Internet at <http://home.netscape.com> by sending email to info@netscape.com or by calling 650-937-2555 (corporations) or 650-937-3777 (individuals). SageMaker Signs Three Petroleum Heavyweights
BUSINESS WIRE
October 19, 1998

FAIRFIELD, Conn.--(BUSINESS WIRE)--October 19, 1998--
Royal Dutch/Shell, Amoco, and Elf Gain Leading
Knowledge Creation Solution

SageMaker, Inc., a global provider of solutions for business intelligence assimilation, management, and analysis, today announced the signing of three new contracts with leading petroleum industry companies, including Royal Dutch/Shell (NYSE:RD, NYSE:ST) Amoco (NYSE:AN), and Elf Aquitaine (NYSE:ELF). The agreements include a total of more than 1,500 user licenses for the SageWave and SageBlade applications, raising the Company's total to more than 60,000 seats and solidifying SageMaker's position as the leading provider of knowledge creation and analysis solutions to the petroleum industry. Financial details were not disclosed.

"In an environment as competitive as the petroleum industry, information is a powerful weapon and the ability to make rapid, well-informed decisions is tantamount to gaining a competitive edge," said Ron Bienvenu, President and CEO of SageMaker, Inc. "Shell, Amoco, and Elf understand that a single, centralized portal for all their information and knowledge creation needs simplifies access to their information resources while slashing analysis and response time. That's a tremendous advantage in today's energy market."

With the addition of "My SageWave," The Sage suite of products now provides the end-user with the ability to **personalize** their SageWave environment. One can choose to display internal and external information sources of choice, along with saved query routines, site tools, favorite internet web sites and other display options, creating a **personalized** gateway for each individual user.

Additionally, use of the SageMaker solution gives these companies an industry-first capability to track the use and flow of information throughout their organizations. By using SageMaker's Information Management Program (IMP), companies can accurately determine and control the cost of their investments in information. In doing so, the value of the information a company pays for is maximized and exposure to copyright infringement is minimized.

The SageMaker line of products, SageServer(TM), SageBlade(TM), and SageWave(TM), tackle the problem of "infoglut" by aggregating industry-specific data, assimilating it on a common data model, and delivering the product to subscribers electronically over the Internet through secure **business portals**. This approach provides an industry-first ability for information consumers to compare, contrast, analyze, reconfigure, and draw meaningful business conclusions from widespread or disparate sources of information.

SageMaker, Inc., makers of SageServer, SageBlade, and SageWave, was founded in 1993 to provide companies with the tools to gather, analyze, and utilize industry- **specific business** intelligence. SageMaker delivers assimilated industry information across the corporate enterprise using a common data model. For more information, visit SageMaker on the World Wide Web at www.sagemaker.com. SageMaker, SageServer, SageBlade, and SageWave are trademarks of SageMaker, Inc.

E-business Information Portal From Viador Draws Analyst Support

PR NEWSWIRE

January 25, 1999

Enterprise Information Portal Solution Enables Business Analysts and Managers to Spend More Time Strategizing and Less Time Searching Disparate Corporate

Data Sources for Needed Information

SAN MATEO, Calif., Jan. 25 /PRNewswire/ -- Viador(TM), formerly known as Infospace, Inc., today announced that industry analysts are supporting the new Viador E-Portal Suite(TM). The web-architected suite of products provides a single architecture for securely searching, analyzing, and delivering corporate data. The Viador E-Portal Suite gives business decision makers a "portal-like" view into a corporation's business information. It represents a true breakthrough because of its ability to integrate nearly all types of corporate data and deliver that information to end-users in an intuitive to use web-based portal front-end.

META Group-Application Development Strategies

"Web portals, like Viador's e- **business portal**, represent a significant new trend in content management and business intelligence by making information more easily available to the masses" said Liz Shanham, senior research analyst, Application Development Strategies, META Group. "Viador's e- **business portal** is an ideal solution for business analysts needing an intuitive process to retrieve information about critical business metrics. One simple interface opens doors to obtaining information from a host of corporate data sources."

Aberdeen Group-Decision Support Research

"Portal technology can elevate the value of business intelligence tools, but it also requires that the tools give business users the freedom to define the type of information they need and the assurance that the system will automatically retrieve the request," said Bob Moran, director, decision support research at Aberdeen Group. "The Viador solution's server-based architecture is the linchpin to its ability to deliver one common interface for managing information stored in relational, OLAP, ROLAP, DOLAP, and Metadata formats."

Hurwitz Group-Business Intelligence Service

"Viador has long been a leader in the integration of reporting, query, and analysis tools in a single user interface that simplifies information access for business intelligence users," stated Philip Russom, director of the business intelligence service at Hurwitz Group. "Viador has now extended that interface to include enterprise portal capabilities, which can be **tailored** to individual needs and provide one-click access to any enterprise information source. Combined with their integrated OLAP engine and user-friendly report designer and administrative tools, Viador's tightly integrated offerings constitute a comprehensive web-based information delivery platform that is unmatched in today's market."

Hurwitz Group-E-Business Strategies

"E-business information applications are a vital part of supply-chain integration between suppliers, customers and resellers. Although talked about less frequently than e-commerce, they are every bit as valuable," comments Heather Ashton, senior analyst of electronic business strategies at Hurwitz Group. "I see a lot of opportunity for e-business solutions like Viador that provide comprehensive enterprise information portals to help organizations better communicate the information their e-business partners need."

Patricia Seybold Group-Business Intelligence and Data Warehousing

"Unlike popular consumer related portals, like Yahoo!, that deliver sports scores, weather reports, and world news, corporate information portals will address the challenge of funneling financial status reports,

customer retention analysis, and sales forecasting information to millions of desktops worldwide," states Mitch Kramer, director of business intelligence and data warehousing at Patricia Seybold Group. "We expect this market to grow quickly and Viador will be a key player."

About Viador Inc.

Viador Inc., formerly Infospace, Inc., is the leading developer of Enterprise Information Portals that help corporations leverage all their business information through a single, integrated architecture. The company's Viador E-Portal Suite gives thousands of users, including business managers and analysts, rich yet easy-to-use business intelligence functionality based on a thin-client architecture that supports widespread deployment at a low cost of ownership. Viador's breakthrough technology has won customers including 3Com, Charles Schwab, Citibank, FedEx, IRS, Lucent Technologies, Sprint PCS, and Xerox. Headquartered in San Mateo, Calif., Viador is a privately-held company backed by Crosslink Technology Partners, ITV, Mitsui & Co., and Technology Associates. For more information, call 650-685-3000 or visit the Web site at www.viador.com.

BizProLink Accelerates Expansion of Business-to-Business Vertical Portal Network
BUSINESS WIRE
February 24, 1999

BOCA RATON, Fla.--(BUSINESS WIRE)--Feb. 24, 1999--
Overwhelming Response Spurs Rapid Development of 16 Portals
Serving Popular Professions
Privately held, BizProLink (www.BizProlink.com), a leading provider of profession- **specific Business -to- Business portals** , today announced an accelerated launch schedule for its popular e-commerce network.

The company has expanded its offerings to include 16 mainstream professions in the current quarter, with plans for a total of 100 portals in multiple countries and languages by year-end. Professions currently online include: Accountants, Architects and Designers, Attorneys, Banking professionals, Building Contractors, Dental Professionals, Educators and Administrators, Foodservice Professionals, Hotel Professionals, Insurance Agents, Investment Specialists, Law Enforcement Professionals, Medical Professionals, Pharmaceutical Professionals, Real Estate Agents, and Travel Agents.

"The immediate, positive response to our Business-to-Business network is extremely encouraging. We've had professionals from 54 countries using our network since we launched in December, 1998. With only a limited amount of time in their work day, professionals can't afford to waste it sorting through massive amounts of consumer information," said BizProLink's founder and president, Steven Sponder, who created and developed a Business-to-Business site in partnership with MSN (The Microsoft Network). "Consumer portals like Yahoo, Excite, and Lycos do a great job serving the

consumer-home market, but BizProLink is all Business," said Sponder.

At no cost to a user or business, BizProLink provides an online resource that is fast, useful, and easy to navigate. One click on BizProLink's main page sends a user directly the vertical industry site of their choice. Each of the 16 sites contains listings of resources called "Content Channels" compiled and maintained by an expert in each particular profession. These "Content Channels" include resources related to: Marketing, Business Opportunities, Consultants, Operations Support, Discussion Forums and Live Chats, Personal Development, Education and Seminars, Legal Services, Product Auctions, Links to Publications, Upcoming Events, Recruiting and Training, Financial Services, Government Resources, Technology, Trade Associations, Insurance Services. In addition, the portal provides Free Email, Stock Tickers, Local Weather, Web Site Construction, Travel Services, Maps & Directions, Translations, Business Searching, Package Delivery, Y2K Solutions, as well as an "All Products" category for buying and sellers that lists all brands, manufacturers. Additionally, all qualified businesses can be listed on the portal for no charge through an "Add Your Site" option.

"With Business-to-Business e-commerce growing from it's current level of \$17 Billion in 1998, to \$327 Billion in 2002, we fully expect BizProLink to be as successful with business users as Yahoo is with consumers. And with the recent highly successful IPO of VerticalNet (Nasdaq:VERT), the internet's only other vertical market Business-to-Business portal network, we feel quite confident about our future," said Kevin Goch, Executive V.P. Investor Relations.

BizProLink has established strategic affiliations with a growing number of major companies, including Amazon.com, OfficeMax, Ecommercesoft, Nordby International, and MCI WorldCom.

Note to Editors: BizProLink Inc. Headquartered in Boca Raton, Fla., consists of a single web navigation site (portal) for each targeted profession. Currently, users in 54 countries select their profession from the main page, then encounter a wide range of content and links focusing exclusively on their profession. BizProLink is a registered trademark of BizProLink Corp. in the United States and/or other countries. For the most recent press information, go to <http://www.bizprolink.com/press.shtml>
